# Security Guarding

Our Security Guarding service is like having a reliable friend always there to look after your construction site. We put well-trained guards in place to watch over everything, making sure your project goes smoothly, without any hitches. These guards are on duty all the time, ready during the day and alert through the night, making sure everything is as it should be.

Imagine having someone whose only job is to keep an eye out for anything odd or out of place. They're like watchful protectors, making sure everyone on site is supposed to be there, and keeping those who shouldn't be away. It's their job to notice things that might not seem right and to take action to keep everyone safe.

Our guards are part of your team when they're on your site. They stand firm to make sure your site is secure, your equipment is safe, and your team can work without worrying about safety.

It's really all about peace of mind. With our Security Guarding service, you can focus on the work at hand, knowing that someone trusted is looking out for your site's safety. No need to stress over security risks or unwanted visitors. We've got it covered. Safety isn't just a part of what we do; it's our top priority.

# K9 Security

Our K9 Security service is like having a team of superhero dogs on your construction site. These aren't your regular dogs; they've been specially trained to find trouble before it finds you. They work right next to our human guards, adding an extra strong layer of protection that keeps your site safe.

Imagine these dogs as your friendly, furry protectors who are super quick and always ready. They're great at making sure people who shouldn't be there stay away, just with their presence. These dogs have a special ability to check a big area really fast, much quicker than people can, making sure everything is okay.

These K9 heroes are always on the lookout, making your construction site a place where troublemakers think twice before entering. It's like having a loyal friend who's also a top-notch security guard.

Our dogs are trained to be nice to people who are supposed to be on the site but very serious about keeping out anyone who's not. They know when to be gentle and when to stand firm. Our K9 Security, you get peace of mind, knowing that these four-legged guardians are watching over your site, making it a safe place to work and build.

## Key Holding & Alarm Response

Our Key Holding and Alarm Response service is like having a reliable security partner who's always ready to watch over your place. We keep a set of keys to your construction site so if any alarms start ringing, whether it's the middle of the night or during a heavy rainstorm, we're on our way to check it out immediately. You can count on us to be there, no matter what.

Think of it this way: when an alarm sounds, it could be anything from a stray cat setting it off to something more serious. We're there to figure out what's going on. If it turns out to be nothing, we'll reset the alarm and make sure everything's locked up tight again. But if there's a real issue, like someone trying to sneak in or a safety problem, we take care of it right away and let you know what happened.

This service is all about making sure you can sleep easy, not worrying about what's happening at the site. With us holding the keys and responding to alarms, you know that someone responsible and quick is looking after your site, ready to act in any situation. It's our job to give you that comfort and confidence, knowing your construction site is in good hands, always ready and secure.

## Mobile CCTV Towers

Our Mobile CCTV Towers stand guard over your construction site, offering a panoramic view to ensure everything is under control. Available across the UK, these towers are equipped with state-of-the-art cameras that monitor every corner of your site, day and night. They record continuously, ensuring that any suspicious activity is captured, acting as a modern deterrent to anyone thinking of causing trouble.

These mobile towers are incredibly versatile and can be moved to different spots as your project evolves, making sure that all areas are covered at all times. This way, nothing goes unnoticed, and you can have a complete visual record of everything happening on-site.

Think of these CCTV towers as your silent protectors. They're always on duty, quietly watching over your site to keep it secure. These towers are an essential tool in preventing theft, vandalism, and other security breaches, ensuring that your construction project proceeds smoothly and without interruption.

By choosing our Mobile CCTV Towers for your site, you're not just getting a security solution; you're getting the peace of mind that comes from knowing your site is watched over by the best in the business, no matter where in the UK you are. This is security made simple, effective, and always vigilant.
